

Executive Summary - Retail Analytics

Scope: Day 2 and Day 3 outputs | Period: 2021-01 to 2025-10

Business Question 1: How is revenue trending?

- Total revenue reached AED 73,214,931.3 across the observed period.
- The most recent month (2025-10) recorded AED 771,516.47.
- Latest YoY growth is -14.83%, indicating a recent slowdown that needs category-level action.

Business Question 2: Where is revenue concentrated?

- Dubai is the top-contributing region with AED 41,044,846.36.
- Regional/store-type analysis shows that Mall and High Street formats carry most revenue concentration.
- This supports region-specific assortment and pricing plans rather than a single national strategy.

Business Question 3: What does customer quality look like?

- Champions represent 15.88% of customers (794 customers).
- Repeat purchase rate is 100.0% under the current definition (≥ 2 purchase dates).
- Retention heatmaps show stable engagement for active cohorts, but At Risk/Lost segments still need reactivation programs
